SKILLS

• Languages:	C++, Java, JavaScript, SQL
• Frameworks & Libraries:	React.js, Node.js, Next.js, Express, HTML, CSS, Bootstrap, TailwindCSS
• Tools & Platforms:	MySQL, MongoDB, Git, GitHub, Vercel, Render, Cloudinary
• Core CS Fundamentals:	Data Structures and Algorithms, Object-Oriented Programming, Database Management System, Operating Systems, Computer Networks
• Soft Skills:	Time Management, Leadership, Problem-Solving, Adaptability

PROJECTS

Sevantra GitHub Live	Jul' 26 - Present
- Engineered a full-stack civic engagement platform enabling citizens and NGOs to seamlessly connect, manage organizations, and collaborate on local events. - Implemented secure authentication with OTP verification and Google OAuth, alongside a robust role-based system and an admin dashboard with real-time analytics. - Architected as a scalable Turborepo monorepo with a Next.js frontend and Express.js backend, utilizing Prisma ORM with PostgreSQL, deployed on Vercel and Render. Tech stack: Next.js, Node.js, Express.js, PostgreSQL, Prisma, Tailwind CSS, Turborepo	
SafetyWatch GitHub Live	Dec' 25 – Jul, 26
- Developed a comprehensive neighborhood safety application enabling users to report incidents, track local crime via interactive heatmaps, and participate in gamified safety challenges. - Built a real-time private messaging system with Cloudinary-backed screenshot moderation, alongside a life-saving SOS feature that instantly alerts contacts via Telegram webhooks and SMS. - Created Nexus AI, an intelligent security assistant powered by Google Gemini, programmed with strict system prompts to provide hyper-focused safety guidance. - Managed JWT & Firebase authentication, comprehensive administrative dashboards for bulk incident management, and automated system audit logging. Tech stack: React (Vite), Node.js, Express, MongoDB (Mongoose), Google Gemini AI, Telegram Bot API, Cloudinary, Firebase, JWT, Zod	

TRAINING

Skill Stones – Java Fundamentals	Jun' 25 - Jul' 25
- Learned core Java programming concepts and Object-Oriented Programming (OOP). - Implemented Java programs using classes, objects, inheritance, polymorphism, abstraction, and encapsulation. - Gained knowledge of control structures, arrays, strings, methods, and exception handling. Tech stack: Java	

CERTIFICATES

• Oracle Data Platform 2025 Certified Foundations Associate – <i>Oracle University</i> Link	May' 26
• Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – <i>Oracle University</i> Link	May' 26
• Build Generative AI Apps and Solutions with No-Code Tools – <i>Infosys Springboard</i> Link	Aug' 25
• Java Fundamentals – <i>Skill Stones</i> Link	Jul' 25

ACHIEVEMENTS

• Solved 100+ coding problems on LeetCode , strengthening data structures and algorithms, and problem-solving skills.	Jul' 26
• Achieved a 5-Star C++ rating on HackerRank through consistent problem-solving performance.	Jul' 26
• Participated in BinaryBlitz and CodeOffDuty university level Hackathon.	Mar' 24

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 6.99</i>	Punjab, India Aug' 23 - Present
Jeewan Public School <i>Intermediate; Percentage: 67.2%</i>	Motihari, Bihar Apr' 21 – Mar' 22
C.S. DAV Public School <i>Matriculation; Percentage: 71.7%</i>	Motihari, Bihar Apr' 19 - Mar' 20
